CASE STUDY

Major improvements through detailed exam feedback

Improving the status-quo

The degree program Information Management at the FH JOANNEUM managed to uplevel existing exam processes through the use of innovative software and technology. Academic English, Digital Media Technologies, and Informatics courses are now testing students' knowledge using the latest exam software, and students also receive detailed feedback through biz:Examiner on which topics they need to improve on. This feedback is even available for complex question types, such as text-match questions.

"

biz:Examiner helps us to better serve our students, and do so more effectively. Through biz:Examiner we reduced the time to correct exams by up to 66% through applying innovative technology.

Lisa Zimmermann, Professor, FH JOANNEUM

Excellent service and empowering technology

Starting with the complex job of transferring the existing item database, to the flexibility of reporting, and the possibility to give detailed feedback and mark exams online - FH JOANNEUM managed to reach their goals with biz:Examiner.
